Professional Profile

Geomatics engineer specializing in geographic information systems and databases. Excellent knowledge of all stages of cartographic production. Solid experience in Development of 2D and 3D mapping web solutions.

Skills

Image processing: ArcGIS, QGIS, Global Mapper
Geographic information systems (GIS): PostgreSQL, PostGIS, Arcpy, QGIS, ArcGIS Pro
Photogrammetry: Agisoft Metashape
Cartography: Topographical and thematic maps
Design of spatial databases: Enterprise Architect
Web development: Django, GeoDjango, Leaflet, OpenLayers, Cesium, GeoServer, Wamp, NGINX
Programming languages: Python, JavaScript, HTML, CSS, Flutter
Artificial Intelligence / Deep Learning : Tensorflow, Keras, Pytorch
Personal skills: Project management, teamwork, communication

Professional Experience

Geomatics Engineer, National Center for Cartography and Remote Sensing (CNCT)

(August 2022 – Now)

- GIS Department Manager
- Project Manager
- Management of different geo-spatial software (ArcMap, Arcpy, QGIS, ArcGIS Pro, Global Mapper)
- Development of geospatial applications

Training Courses

- Scrum Fundamentals For Scrum Master and Agile Projects / Udemy
- Fundamentals of Network Security / Udemy
- Computer Vision with Embedded Machine Learning / Edge Empulse

Articles

- An Upgraded-YOLO with Object Augmentation: Mini-UAV Detection Under Low-Visibility Conditions by Improving Deep Neural Networks. (30 / 09 / 2022)
